

PORKYCOIN

WHITEPAPER

[HTTPS://PORKYCOIN.COM](https://porkycoin.com)

INTRODUCTION

PorkyCoin is a crypto token representing its services and a growing community. It has been created to take advantage of the opportunities offered by the crypto world and to create wealth for our people.

It was born with the purpose to be fully integrated in the broader system of services and apps, so to offer a large connectivity within its ecosystem.

We have officially launched the token on the Binance Smart Chain standard (BEP20) on November 14, 2021. With the PorkyCoin token you can easily, transfer, buy and sell it. We built it with an intelligent coding that offers benefits to loyal holders with rewards and protection against whales (large portfolios), toxic for this ecosystem. We are the founders, the backers and the protectors of the PorkyCoin token and its ecosystem we would do anything to keep it safe and to support its growth.

Trust is key for people and at PorkyCoin we have been and will always be open and transparent in the decisions we make. We created an ecosystem where our people will always be put at first. To ensure our long term commitment we blocked 8% of the founder's token supply for 2 years and it will remain blocked as long as necessary.

To support the long-term value in PorkyCoin, our token has been set with a distribution feature to loyal holders and an automatic liquidity contribution. This is combined with manual burns to reduce existing supply.

PorkyCoin is the natural evolution of the hard work of the team during the last few years. With the use of the blockchain technology, you are now able to buy, exchange and use the PorkyCoin token. It is very easy!

We have big big plans for our community and everyone will benefit from it. Joining us, together we can embrace an incredible and ambitious path.

ABSTRACT

We are one of the few tokens (/crypto coins) with substance and a real project behind. Long before then introducing of our token in November 2021, we have built over the years our own healthy ecosystem, working independently without waiting for big companies or corporations to accept us.

We have different platforms and services where PorkyCoin will gradually fully integrated and interconnected.

Social network (Qbaface): <https://descarga.qbaface.com/> – An independent social network where you can make friends, interact with members, make payments (p2p), make telephone recharges, pay for membership, do marketing campaigns, organize donations to both charitable groups and private groups. It will have a Wallet with possibility to store your coins and you will also be able to exchange/swap it with recognized crypto currencies and much more.

Online dating application (Cubamor): <https://descarga.cubamor.app> – A fast growing social dating application where people can meet and interact. Soon, on this app you will be able to pay memberships or transfer the PorkyCoin via chat.

Taxi application (Montate): <https://montate.app> – An app to get taxi rides (in the final development stage). For each trip, PorkyCoin will be distributed to both the taxi driver and the client so to support our token market. Soon, on this app you will be able to do the full payment for the service using the PorkyCoin token.

Sales application: (Qbasales) <https://qbasales.com/> – An app to let buyers and sellers of products to meet and interact. The big chunk of the profits we make with this business are used to support PorkyCoin.

Cerdo Asado: <https://cerdoasado.com/> – This is our first and leading company in our family. It is a business based on the selling activity of roast pig (cerdo asado). This is a great start for the PorkyCoin, as part of the profits of the business are used to offer PorkyCoin as a form of rewards to customers. In the future customers will be able to pay for the service using PorkyCoin.

All the customers rewards offered by all our applications or companies are the result of a market purchase: we use our profits (in fiat currency like USD and EUR) to buy PorkyCoin, and then deliver them to the customers' crypto wallets. This a virtuous circle that let our token to grow and thrive.

We are working hard to increase and include in our ecosystem many other businesses. The introduction of the PorkyCoin token is just the last step of a long journey and the beginning of a superior integration.

Various different businesses such as restaurants, rental houses, agro markets, hairdressers and other privately run businesses, will be linked. Many more surprises are yet to come.

WHY BINANCE SMART CHAIN?

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (DeFi). BSC uses a token protocol developed by the BinanceTeam called BEP-20.

Advantages of the Binance smart chain are:

It's a sovereign blockchain, which will provide security and safety to all users and developers.

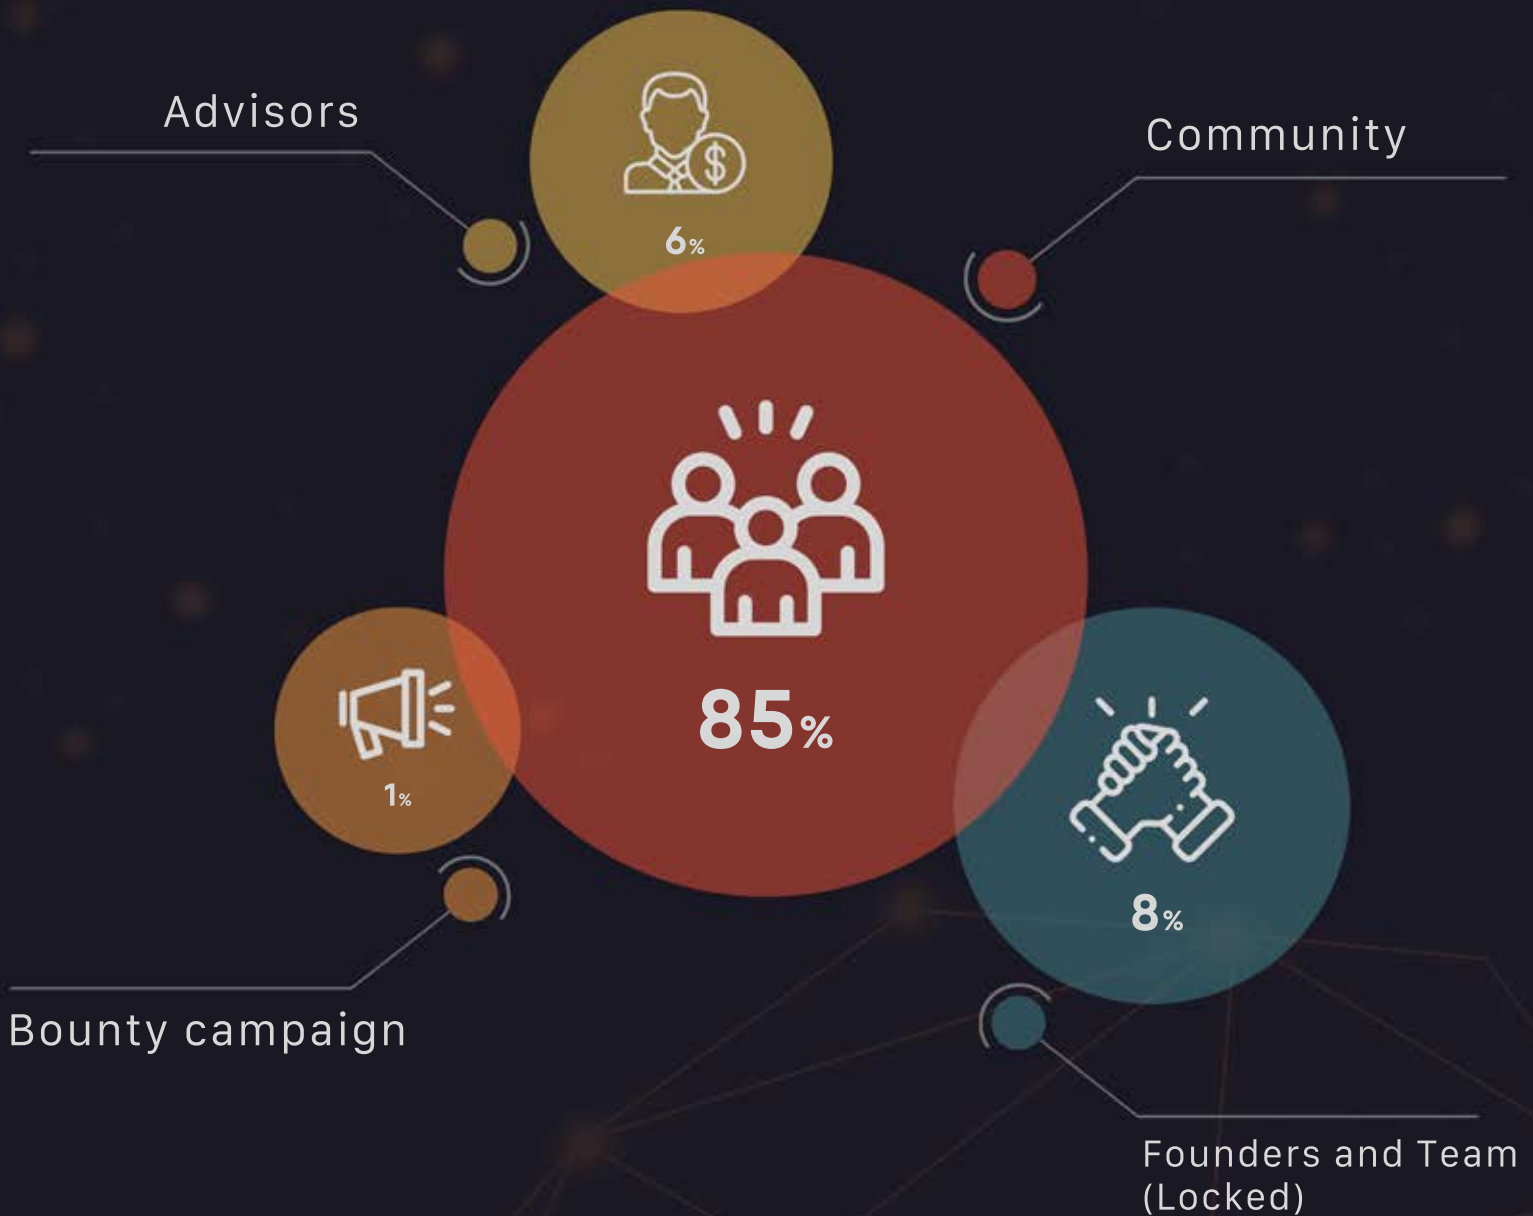

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

PERCENT DESTINATION

The PorkyCoin token was born to be totally self-sustaining and to support the full integration and interconnectivity of the services and apps of our growing ecosystem.

To achieve this we started the PorkyCoin token with certain built-in features applied to the spread of each transaction (start-up phase). This spread will be reset and eventually lowered in the following phases (see 2 & 3) as per below.

Please consider these numbers as indicative, as the PorkyCoin project is evolving and will adapt to the needs of the community and its ecosystem. What is absolutely certain is the aim of the project: protect and grow the community, then last but not least deliver a positive change to the worlds through the use of donations. This will always remain immutable.

1) Start-up phase

- **Automatic LP:** 10% of each transaction is automatically added to the liquidity pool. This contributes to continuously increase the price floor and to decrease the price volatility. This has the effect of multiplying the liquidity available in the DeFi ecosystem, protecting the project and its holders (old and new).

- **Distribution to holders:** 2% of each transaction is redistributed to all existing holders. This works exactly like dividends for equity investors, but with our token the dividends are distributed every day (and not every 3, 6 or 12 months).

- **Donations & manual burns:** 1% of each transaction is taken to be used for our donations and for manual monthly burns. This percentage is initially kept low as we are in a start-up phase.

Total: 13%

2) Growth & Establishment phase

- **Automatic LP:** this will be lowered to 6% from previous 10%, as the token will have already achieved a good liquidity profile.

- **Distribution to holders:** this will be increased to 3% from previous 2%, so to increase the premium for holders loyalty.

- **Donations:** this will be increased to 2% from previous 1%, as our goal is to deliver a positive change to this world.

- **Manual burns:** this will be increased to 2% from previous 1%, to lower the token supply in circulation.

Total: 13%

3) Expansion & Consolidation phase

- **Automatic LP:** this will be lowered to 2% from previous 6%.

- **Distribution to holders:** this will stay at 3%.

- **Donations:** this will be increased to 3% from previous 2%.

- **Manual burns:** this will stay at 2%.

Total: 10%

ROADMAP

PHASE 04

Interconnected Blockchain Swaps. Launchpad, Farming, Staking. Nextgen NFTs. Crypto Outreach Program. Top 50 crypto by Marketcap

PHASE 02

PWhitepaper Release. Coinmarketcap + Coingecko Listing. Growth, Promotions, Awareness. Influencer Marketing. 50,000 Community Members

PHASE 05

Wallet creation (PigWallet). Integration of Porkycoin in different apps, as a social network and more of our own. Pigswap creation. Creation of two currencies that will increase the burning and growth of our ecosystem. And more surprises to come

PHASE 03

Auditoría Certik. Decentralized DAO voting system. High profile associations. HODL incentives increase. Top 100 cryptocurrencies by Marketcap

PHASE 01

Website Launch. Smart Contract Deployment. 10K Community Members. 100% Fair Token Launch. DEX Listing. Liquidity Lock with PancakeSwap

DONATIONS

PorkyCoin is a self-sustaining system that we are meticulously building for our people. Part of the wealth created will be put at work through donations and direct assistance to underdeveloped areas.

PorkyCoin will focus directly to reduce the climate impact in unfavorable areas, helping families to develop a more efficient way to plant and raise animals in a sustainable way, creating courses, fairs and seminars guided by professionals in the area where donations are delivered. We will help farmer with tools to work in the field and we will install solar panels to let them access to precious energy and thus eliminate fossil energy.

We could write more about this topic but we prefer to put all our efforts toward the execution of these projects, rather than wasting precious time writing empty words on a website.

See you soon on the donations blog to celebrate each achievement we will make together.

DO NOT FORGET THAT OUR COMPANY WILL EXECUTE THE PROJECTS, BUT THE TRUE GIVERS OF HAPPINESS ARE ALL OF YOU
